```

O accordion do Bootstrap é um componente que permite organizar conteúdo em seções, onde apenas uma seção pode ser exibida por vez.Quando um usuário clica em um cabeçalho, o conteúdo da seção correspondente é exibido. Se o usuário clicar novamente no cabeçalho, o conteúdo da seção será ocultado.

Navbai

<strong>This is the first item's accordion body.</strong> It is shown by defaul

O YouTube usa uma técnica chamada "lazy loading" para carregar os vídeos sempre que o usuário rolar para baixo na página.

O YouTube usa uma série de técnicas para implementar o lazy loading. Uma técnica é usar um atributo data-src no elemento video. O atributo data-src especifica o URL do vídeo que deve ser carregado. O YouTube não carrega o vídeo até que o atributo data-src seja avaliado.
